Does your child need a school physical and/or vaccines before school starts August 8, 2018

Daviess County Health Department would be a great option

Generally school age children are due for shots between ages 4-6 (before entering school) and 11-12 prior to 6th grade.

Green River Daviess County Health Department only has vaccines for children who qualify for the Vaccines For Children (VFC) program. Refer to our website to see if your child qualifies.
