COMMUNITY HEALTH IMPROVEMENT PLAN (CHIP)

A Community Health Improvement Plan (CHIP) is a long term strategic plan to address priority health issues identified within a community. The CHIP was created through a community-wide collaborative process involving partners and the public to assess strengths, weaknesses, challenges and opportunities within our community and identify the overarching goals necessary to improve the health of the community. It is intended to serve as a vision and framework for guiding the development of policies and implementation of actions that promote health. Through sustained, focused efforts, community members can align and leverage resources and engage partners to assess, plan, develop, support and implement strategies which will directly impact community health outcomes and indicators. We encourage community members individually, within your organizations, and collectively as a community to become involved and commit to improve the health and well-being of Kentuckians living in Green River District.

PLANNING AND PROCESS

The methodology used for the 2018 Community Health Assessment was Mobilizing for Action through Planning and Partnerships (MAPP). This interactive, community-driven strategic planning process was a natural selection after its success in the previous cycles (2012-2015) and (2015-2018). The MAPP framework assesses the capacity of the public health system in meeting the specific health status needs of a community or in Green River's case, each of the seven counties we serve. It naturally builds a stronger public health infrastructure through partnerships and promotes community responsibility for health.

MAPP uses four unique assessments to identify issues influencing public health and the resources to address them. The assessments used in the MAPP process include: Community Health Status Assessment, Community Themes and Strengths Assessment, Forces of Change Assessment and the Local Public Health System Assessment. GRDHD utilized a variety of methods to inform the MAPP assessments.

	Themes and Strengths Assessment	Forces of Change Assessment	Local Public Health System Assessment	Health Status Assessment
CASPER	X	X		
Community Dialogue		X		
Photo Voice	X		X	
Data Sheet				X
NPHPSP LPHS			X	

Local communities utilized the results of the Community Health Assessment as a guide to establish priorities and develop strategic planning efforts to effectively improve the health of our communities through the Community Health Improvement Plan. County partners created work groups to focus on specific strategic initiatives and identified agencies or individuals to lead each work group. As groups implement evidence based programs and complete the steps toward achieving their established goals, status reports are submitted to the Green River District Health Department.

The 2018-2021 CHIP Aligns with National and State Priorities

Each county will feature an alignment chart that demonstrates the planning process included consideration of both national and state health improvement priorities. Including:

- ❖ **The 10 Essential Public Health Services**- The National Public Health Performance Standards Program (NPHPSP) tool used to measure the capacity of the Public Health System to deliver the ten Essential Public Health Services (EPHS).
- ❖ **Healthy People 2020**- A 10-year national agenda with outlined objectives for improving America's health.
- ❖ **Kentucky Department of Health's State Improvement Plan**- statewide health improvement goals and objectives. The KSHIP areas of focus to improve health outcomes are:
 - Substance Use
 - Smoking
 - Obesity
 - Adverse Childhood Experiences
 - Integration to Health Access

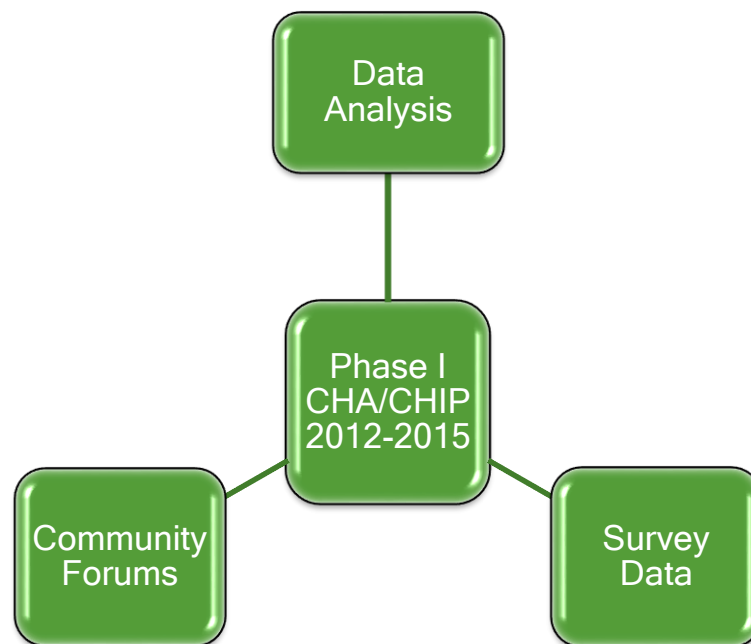

Essential Public Health Services

1. Monitor health status to identify community health problems.
2. Diagnose and investigate health problems and health hazards in the community.
3. Inform, educate, and empower people about health issues.
4. Mobilize community partnerships to identify and solve health problems.
5. Develop policies and plans that support individual and community health efforts.
6. Enforce laws and regulations that protect health and ensure safety.
7. Link people to needed personal health services and assure the provision of health care when otherwise unavailable.
8. Assure a competent public and personal health care workforce.
9. Evaluate effectiveness, accessibility and quality of personal and population-based health services.
10. Research for new insights and innovative solutions to health problems.

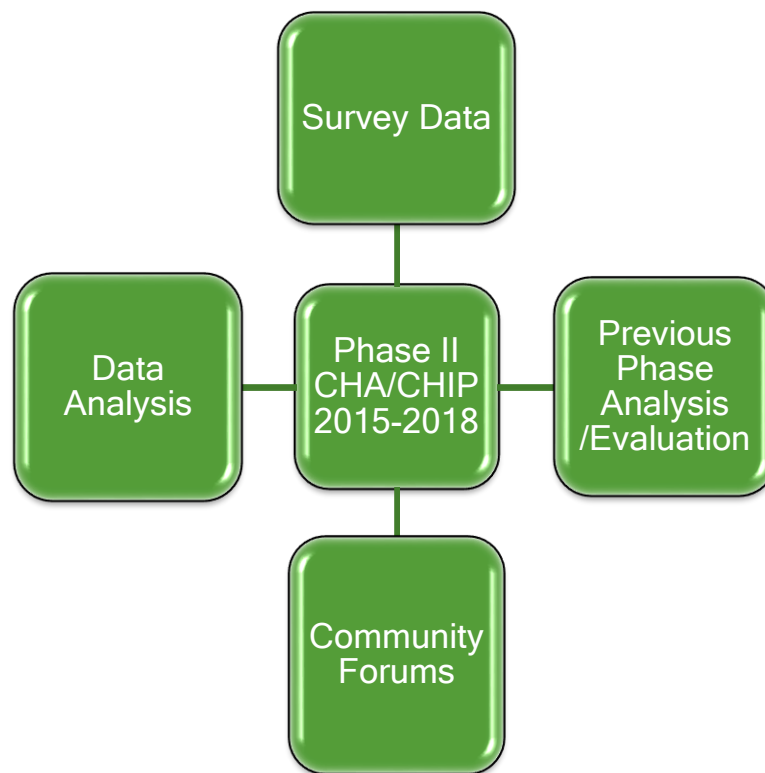

CHIP Evolution

Two (3 year) phases of CHA/CHIPs have been undertaken in the Green River District Community Health Improvement Plan. Each phase included two components: a CHIP which was built upon a Community Health Assessment (CHA). Improvements in the process occurred during Phase II by adding a review of the CHA/CHIP Cycle and implementing necessary adjustments. Phase III (2018-2021) will continue to review the cycle and add improvements and adjustments as necessary.

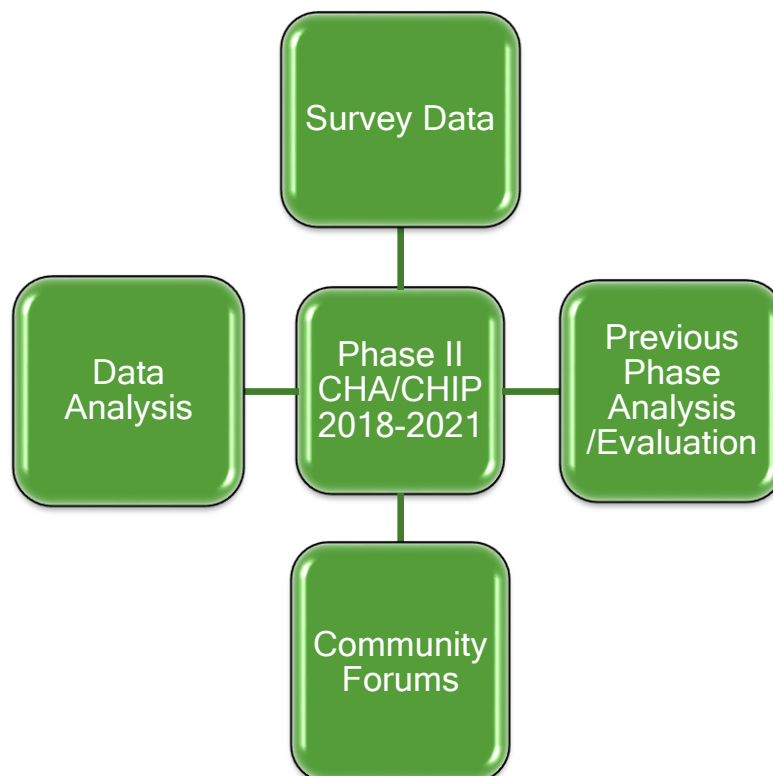

The 2012-2015 CHA/CHIP (Phase I) used a three pronged approach to identify strategies to lead to improved health outcomes.

The 2015-2018 CHA/CHIP (Phase II) used a four pronged approach to identify strategies to lead to improved health outcomes.

The 2018-2021 CHA/CHIP (Phase III) will use the same four pronged approach as Phase II: Data Analysis, Surveys, Community Forums and Analysis of the previous cycles.

2012-2015 CHIP Initiatives

- Reduce Substance Abuse/Tobacco Use
- Reduce Obesity
- Improve/Increase Access to Care
- Teen Issues

2015-2018 CHIP Initiatives

- Reduce Substance Abuse/Tobacco Use
- Reduce Obesity
- Reduce Diabetes
- Improve Healthy Lifestyles
- Improve/Increase Access to Care

Plans for Policy and System Level Changes

Green River District Health Department is proud to say that this cycle of the Community Health Improvement Cycle features more plans for policy and system level changes to alleviate health inequities than ever before. We continue to educate in various platforms including the health coalitions that it is simply not enough for individuals to be taught behavioral changes to live healthier lives. We as an agency have shifted the focus and approach to now exploring and implementing policy, systems and environmental changes. What's more is the fact that we can see that the majority of our community partners are shifting their mindsets and tactics as well.

The Health Impact Pyramid (right), developed by previous CDC Director, Dr. Thomas Frieden, displays the smallest to largest impact of factors affecting health. The CHIP strategies and objectives reflect all tiers of this pyramid, but will prioritize Policy, Systems and Environmental changes as interventions with the potential for high impact for the total population.

Source: Frieden T. *Am J Public Health*; 2010; 100(4)

Watch for the  throughout the document. It will indicate the potential for policy and system changes.

Identifying Strategic Issues

The preliminary findings of the Community Health Assessment were used to help community stakeholders select areas of focus to improve the health of their communities. A summary of the visioning, assessments and data was presented at each of the county Community Health Assessment Forums beginning in March 2018. Those that were in attendance were able to participate in the MAPP Process, develop a community vision, provide input to the findings of the assessments and select their priority areas for each county. Green River District Health Department, partner agencies and local community coalitions have selected priority issues, developed goals and will implement evidence based programs, policies and interventions to address these areas identified in the 2018-2021 Community Health Improvement Plan.

Taking Action

Subcommittees in each county will plan, implement and evaluate activities related to their chosen initiatives. Monitoring progress and collecting data will be ongoing and reported through local coalitions and Green River District Health Department.

The 2018 Community Health Assessment report, Data Sheets and Forum Presentation Recaps can be accessed at: <http://healthdepartment.org/community-health/community-health-plans/>

Jessica Austin and Clay Horton presenting at Community Health Forums

Green River District Community Health Improvement Plan Overview

Below, you will find actions that GRDHD has identified to support the Community Health Improvement Plan initiatives at county and district levels. As the counties convene and establish their 2018-2021 goals and objectives these focus areas will further develop.

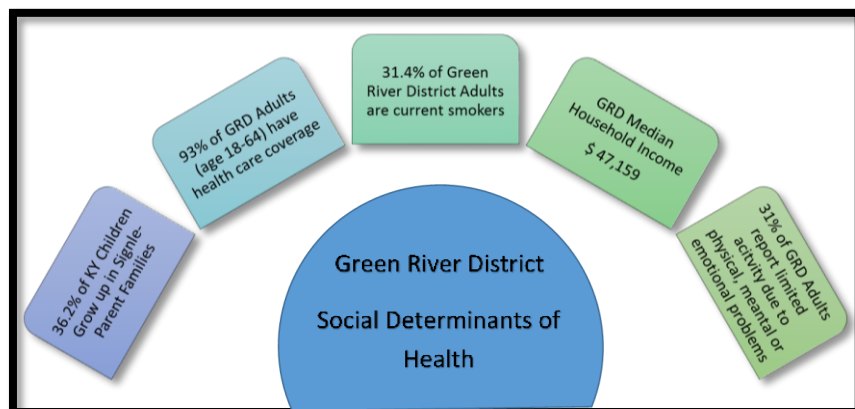

Green River District	
Mental Health:	GOAL: Increase education and awareness of mental health concerns
<ul style="list-style-type: none"> GRDHD will offer 3 Mental Health related community or professional events to the district by January 2020. In 2019, Healthy Henderson will partner with the Green River District Health Department to explore the possibility of training Boys and Girls Staff in Teen Outreach Program evidence-based curriculum. Upon enactment, GRDHD will form and strengthen partnerships in order to provide services and resources to those involved in the Harm Reduction Syringe Access Program throughout the 3 year CHIP cycle. 	

Substance Abuse: Including Alcohol and Tobacco Use	GOAL: Increase advocacy, support and recovery efforts involving alcohol, tobacco and other drugs.
<ul style="list-style-type: none"> Throughout the 3 year CHIP Cycle, GRDHD will continue to promote, support and advocate for an all-inclusive Tobacco Free Policy in each county of the District. Throughout the 3 year CHIP Cycle, GRDHD will continue to advocate for the implementation of the Harm Reduction Syringe Access Program throughout the District. Upon enactment, GRDHD will network with partners on recovery services for those involved in the Harm Reduction Syringe Access Program throughout the 3 year CHIP cycle. Throughout the 3 year CHIP Cycle, Support and promote evidence-based smoking cessation programs throughout the district. 	
Exercise and Nutrition Education	GOAL: Increase collaboration in health related community events.
<ul style="list-style-type: none"> GRDHD will participate in at least 5 health related community events promoting evidence based information on health/wellness by 2021. During the 3 Year CHIP Cycle, GRDHD will expand upon nutrition education opportunities throughout the district. 	
*The information in this graph is preliminary. Each coalition has the right to modify to best fit their community.

Daviess County Community Health Improvement Plan Overview

Below, you will find a brief overview of what Healthy Horizons, Daviess County's Health Coalition will focus on for 2018-2021. GRDHD and coalition members are responsible for leading the planning phase for the development of SMART objectives, measures, targets and actions. Daviess County will convene in January to establish new objectives based on the 2018 CHA/2018-2021 CHIP. Daviess County chose to finish up activities already planned for the final year of the 2015-2018 CHIP.

DAVIESS COUNTY	
Healthy Head to Toe	GOAL: To address health and wellbeing from a whole body approach.
<ul style="list-style-type: none"> <u>Awareness Activities:</u> <u>Promotion:</u> Sharing resources with community, engage key community members , Better Bites Expansion, Healthy Food and Snack Choices, Healthy Options 	

- Mental Health:
- Explore grant and/or sponsorship opportunities

Substance Abuse

GOAL:

- Increase Awareness:
- Education:
- Mental Health:
- Promotion: Engage key community members

**The information in this graph is preliminary. Each coalition has the right to modify to best fit their community.*

Hancock County Community Health Improvement Plan Overview

Below, you will find a brief overview of what Hancock County's Health Coalition will focus on for 2018-2021. GRDHD and coalition members are responsible for leading the planning phase for the development of SMART objectives, measures, targets and actions. Hancock County will convene in January to establish new objectives based on the 2018 CHA/2018-2021 CHIP. Hancock County chose to finish up activities already planned for the final year of the 2015-2018 CHIP.

HANCOCK COUNTY

Support/Collaborate Community
Events

Goal Here

- Races: Lewisport Heritage
- Lunch and Learns: Diabetes, Senior Care, Autism, etc
- Breast Cancer Awareness: Mobile Mammography Unit, Community Awareness, Pink Out
- 100 Mile Club: Participation, Volunteers, Funders, Donations

**The information in this graph is preliminary. Each coalition has the right to modify to best fit their community.*

Henderson County Community Health Improvement Plan Overview

Below, you will find a brief overview of what Healthy Henderson, Henderson County's Health Coalition will focus on for 2018-2021. GRDHD and coalition members are responsible for leading the planning phase for the development of SMART objectives, measures, targets and actions. Henderson County will convene in January to establish new objectives based on the 2018 CHA/2018-2021 CHIP. Henderson County chose to finish up activities already planned for the final year of the 2015-2018 CHIP.

HENDERSON COUNTY	
Mental Health: Teen Issues	Increase education and awareness of mental health concerns for teens and families.
<ul style="list-style-type: none"> • Healthy Henderson will partner with local schools and mental health professionals to promote parental involvement in counseling opportunities throughout 2019. • Annually, Healthy Henderson will partner with local schools to explore the idea of expanding the availability of Mental Health Providers during school hours. • By August 2019, establish a Boys and Girls Club will be established in Henderson. 	

- In 2019, Healthy Henderson Health Coalition will participate in ribbon cuttings, promotional events and advertising opportunities for the Boys and Girls Club.
- Throughout the 3 year CHIP Cycle, Healthy Henderson will support and promote fundraising opportunities that will benefit the Boys and Girls Club.
- By January 2020, Healthy Henderson will provide a list of at least 6-10 suggested topics to be offered during the Boys and Girls Club Smart Parents Parenting Programs.
- By November 2019, Healthy Henderson will provide a list of at least 6-10 suggested topics to be offered through the Boys and Girls Club Educational Program.
- In 2019, Healthy Henderson will partner with the Green River District Health Department to explore the possibility of training Boys and Girls Staff in Teen Outreach Program evidence-based curriculum.
- Throughout the 3 year CHIP Cycle, Healthy Henderson will promote and refer appropriate individuals and families to local parenting classes, programs, education, and resources (i.e. HANDS Program, Marsha's Place, CASA, etc.)

Obesity/Diabetes: Physical Activity

Goal Here

- Physical Activity Opportunities at Work
- Physical Activity Opportunities at School: GoNoodle, Recess, Activity Breaks
- Exercise Education:
- Community Fitness Opportunities: Ball Courts, Bike Paths, Free Events

Substance Abuse: Alcohol, Tobacco and Other Drugs

Goal Here

- Throughout the 3 year CHIP Cycle, Healthy Henderson will continue to promote, support and advocate for an all-inclusive Tobacco Free Policy.
- Throughout the 3 year CHIP Cycle, Healthy Henderson will continue to promote, support and advocate for a Clean Needle Exchange in Henderson County.
- Upon the enactment of the Clean Needle Exchange in Henderson County, Healthy Henderson will assist with the implementation as appropriate.
- Upon the enactment of the Clean Needle Exchange in Henderson County, Healthy Henderson will research the Mental Health Services needed to offer those that benefit from the exchange.
- Throughout the 3 year CHIP Cycle, Healthy Henderson will partner with and advocate for organizations that are recruiting new Mental Health Providers in Henderson County.
- Throughout the 3 year CHIP Cycle, Healthy Henderson will invite and encourage new members to join the coalition.

**The information in this graph is preliminary. Each coalition has the right to modify to best fit their community.*

McLean County Community Health Improvement Plan Overview

Below, you will find an overview of what Partnership for a Healthy McLean County, McLean County's Health Coalition will focus on for 2018-2021. GRDHD and coalition members are responsible for leading the planning phase for the development of SMART objectives, measures, targets and actions. McLean County also chose to finish up activities already planned for the final year of the 2015-2018 CHIP.

MCLEAN COUNTY	
Mental Health: Youth & Parent Focus	GOAL: Increase education and awareness of mental health concerns
<ul style="list-style-type: none"> Annually, PHMC will host at least 2 mental health awareness activities (suicide prevention, self-esteem, bullying, depression, positive relationships, parenting tips, and/or overall wellness. PHMC will annually create and distribute at least one family friendly Flyer emphasizing the importance of mental health on overall wellness. 	

- PHMC will partner with local schools and mental health professionals to offer a “healthy parenting” event by December 2020.
- PHMC will explore opportunities to support youth led mentoring programs throughout 2019.
- PHMC will seek out grant opportunities and write for at least one grant opportunity to support mental health focused objectives by 2021.

Healthy Housing

GOAL: Increase awareness of Housing Inadequacies and the impact on overall family wellness.

- By December 2018, PHMC will establish a subcommittee to focus on educating the community on overall effects of housing insecurity in youth and families.
- PHMC will present local data and CHA results on housing concerns to policy makers by December 2018.
- By December 2019, PHMC will explore opportunities to support new income based housing in McLean County.
- By June 2020, PHMC will engage new community partners to address healthy housing and substandard living conditions among rental properties.
- PHMC will seek out grant opportunities to support Healthy Housing focused objectives.

Support/Collaborate Community Events

GOAL: Increase PHMC collaboration in health related community events.

- PHMC will participate in 5 health related community events promoting some form of health/wellness by 2021.
- PHMC will present at least 2 grant opportunities to enhance the coalition’s ability to contribute and host/support community events related to improving health and wellness by 2021.
- As part of PHMC efforts to educate the community on health/wellness we will only distribute evidence-based literature at all community events during the 3 year CHIP cycle.
- By December 2019, PHMC will promote existing opportunities for physical fitness, wellness, and/or family activities (i.e., Livermore Riverfront, Myer Creek Park, Fitness Centers, MCMS Walking Track, etc.) through a Fit & Healthy Resource Guide.

- PHMC will look for opportunities to collaborate with healthcare providers for preventative screening/educational opportunities (i.e. Mobile Mammograms, Blood Pressure checks, KCP, etc.) throughout the CHIP cycle.
- Throughout the CHIP cycle, PHMC will advocate for local access to healthy, fresh, affordable foods (i.e.: adding produce and meat to current local business and/or promoting the need for a local grocery store).

**The information in this graph is preliminary. Each coalition has the right to modify to best fit their community.*

CHA Data Supporting McLean County CHIP Initiatives

Housing

17.9% of McLean County residents live in substandard housing*

*owner- and renter-occupied housing units having one of these conditions - no plumbing; lack of kitchen facilities; more than 1.01 persons occupying a room; cost burdened monthly housing cost ¹

Food Access

14.2% Food Insecurity Rate in last year *

* consistent access to adequate food; struggling to avoid hunger or face the struggle of hunger in last year ²

Potential Policy Changes

Housing

- Increase availability of affordable housing
- Strengthen and enforce rental property standards

Food Access

- Identify sites for farmer's markets and community gardens.
- Encourage farmer's markets and other healthy food retailers to accept WIC and SNAP.

Local, State and National Alignment

10 Essential Public Health Services: 2-7,10

Healthy People 2020: **AHS**-Access to Health Services, **MH**-Mental Health, **AH**-Adolescent Health, Nutrition, Physical Activity and Obesity, Health-Related Quality of Life & Well-Being, **ECBP**-Education and Community Based Programs, **SDOH**-Social Determinants of Health

KY SHIP: Obesity, Integration to Health Access

Ohio County Community Health Improvement Plan Overview

Below, you will find a brief overview of what Ohio County's Health Coalition will focus on for 2018-2021. GRDHD and coalition members are responsible for leading the planning phase for the development of SMART objectives, measures, targets and actions. Ohio County is currently focusing on Smoke/Tobacco Free legislation and will select additional goals in January.

OHIO COUNTY	
Mental Health: Teen Focus	GOAL:
<ul style="list-style-type: none"> <u>Awareness Activities:</u> Suicide Prevention, Depression, Trauma Informed, Adverse Childhood Experiences, Self-Harm, Bullying, Anxiety <u>Education:</u> 	
Substance Abuse	GOAL:

- Drug Rehabilitation Facilities:
- Education: Resources for family members
- Alcohol and Tobacco Use:

Violence Prevention

GOAL:

- Education:
- Awareness Activities: Domestic Violence, Rape Crisis, Domestic Abuse, Child Abuse

**The information in this graph is preliminary. Each coalition has the right to modify to best fit their community.*

CHA Data Supporting Ohio County CHIP Initiatives

Here you see what data Ohio County CHA forum attendees found the most surprising. Lack of resources, and expertise in some of the “surprising” areas lead groups to focus on some less “surprising” issues or incorporated the big issues into other focus areas.

Local, State and National Alignment

10 Essential Public Health Services: 2-7,9,10

Healthy People 2020: **AHS**-Access to Health Services, **MH**-Mental Health, **AH**-Adolescent Health, Health-Related Quality of Life & Well-Being, **ECBP**-Education and Community Based Programs, **IVP**-Injury and Violence Prevention, **SA**-Substance Abuse, **TU**-Tobacco Use, **SDOH**- Social Determinants of Health

KY SHIP: Substance Use Disorder, Smoking, Adverse Childhood Experiences

Potential Policy Changes

Create smoke-free workplaces, school campuses, multi-unit housing, and outdoor spaces to eliminate secondhand exposure.

Only 35.2 % of Kentuckians are protected by comprehensive smoke-free laws. ¹

59% of Kentucky residents have experienced at least one ACE. Of those who experience at least one ACE, **36%** experienced divorce in the household, **27%** experienced a drinking problem in the household, and **26%** experienced verbal abuse. ²

Adverse Childhood Experiences

Stressful or traumatic events occurring before the age of 18 that disrupt the safe and nurturing environments that children need to thrive. These experiences can have negative and lasting effects on health and wellbeing. ³

Union County Community Health Improvement Plan Overview

Below, you will find a brief overview of what Union County's Health Coalition may focus on for 2018-2021. However, Union County Health Coalition is currently lacking leadership. Green River District Health Department hosted an Open House in September 2018 to present the CHA findings. Hopefully, this public event will encourage and inspire the community to create a health coalition.

UNION COUNTY	
Access to Care	Goal Here
<ul style="list-style-type: none"> • <u>Transportation:</u> • <u>Health Literacy:</u> Family Wellness, Youth Led Mentor Programs, Suicide Prevention, Depression, Healthy Parenting, Positive Relationships • <u>Providers:</u> Mental Health, Pediatric • <u>Assistance:</u> Resources 	
Access to Healthy Foods & Lifestyle	Goal Here

- Physical Activity Opportunities:
- Availability: Community Gardens, Restaurants
- Education: Diabetes, Prevention, Healthy Cooking, Family Wellness
- Awareness Activities: Support Groups, Health Coaching, Nutrition Counseling

Substance Abuse: Including Alcohol
and Tobacco Use

Goal Here

- Drug Rehabilitation Facilities: Local Options, Re-entry
- Education: Parents, Youth Mentors
- Resources:

Appendix 2: National and State Alignment

KY State Health Improvement Plan

Appendix 3: Action Plan Template

Below is a template outlining how GRDHD will track coalition activities. This action plan corresponds with 2018-2021 goals and objectives will be tracked monthly and updated annually. Green River District Health Department staff, coalition members and other community partners are responsible for tracking the actions, programs, activities and interventions done to achieve CHIP goals and objectives. GRDHD staff attend regularly scheduled coalition meetings in each of our seven counties. This partnership will serve as another outlet to monitor CHIP progress. Recently, GRDHD staff has initiated a Strategic Planning, Community Education group meeting. The purpose of the meeting is to keep those involved with coalitions and reporting on the same page. Likewise, it is a way to share information and resources as needed.
