<ul style="list-style-type: none"> ▪ Dilapidated buildings/recreation sites ▪ Litter/Dumping ▪ Lack of Access to Dental ▪ Lack of Access to Mental ▪ Poor water quality ▪ Abundance of fast-food ▪ Drug use 	<ul style="list-style-type: none"> ▪ Coal mine pollution ▪ Abandon homes/lots ▪ E-cig/Tobacco Use ▪ Alcohol use ▪ Domestic Abuse ▪ Victim blaming ▪ Poverty ▪ Sexual Assault

A community health assessment (CHA) helps a community to identify key health needs and issues through analysis of data and community feedback. A CHA then helps to guide planning for the Community Health Improvement Plan (CHIP) which is a plan that focuses efforts to address public health problems based on the results of the CHA. The CHIP is a 3 year plan, including goals and objectives to improve the identified strategic initiative areas.

Community Health Status Data
