What are the unique aspects that make Webster County more health, or unhealthy?

Healthy	
<ul style="list-style-type: none"> Walking trails Farmer's Market 	<ul style="list-style-type: none"> Parks Health oriented groups
Unhealthy	
<ul style="list-style-type: none"> Litter Tobacco use 	<ul style="list-style-type: none"> Lack of safe sidewalks Lack of safe places for children to play

A community health assessment (CHA) helps a community to identify key health needs and issues through analysis of data and community feedback. A CHA then helps to guide planning for the Community Health Improvement Plan (CHIP) which is a plan that focuses efforts to address public health problems based on the results of the CHA. The CHIP is a 3 year plan, including goals and objectives to improve the identified strategic initiative areas.
